

JEWEL POST

The Jewel Post is from the original
Clemson building of Newton
County Agricultural High School
which was built in 1914. This building
became the main classroom facility
for Kato Central Junior College in 1928.
The Jewel post was thrown into a dump
truck as the building was being
demolished to provide space for the
current classroom facility which was later
named Newton Hall, around in 1955.
1961. David V. Jones removed the Jewel post
from the dump truck and preserved it for
the next twenty-five years. In October of
1986, during the official opening
Ceremonies for the Main Building Room,
Mr. Jones returned the Jewel post
to the College to be permanently housed
in the Main Building Room.
